

## CASE STUDY

# D2N2 Supports Performance Networks with Skills and Training Providers.

Performance Networks specialise in the design, installation, security and management of bespoke WiFi and fixed networks. As experts in WiFi solutions and WiFi network design, they offer the products and expertise to help get businesses connected with a network that's just right for them – regardless of the size of their business. Established in 2012 our services include WiFi surveys and consultancy, managed WiFi installations and our guest WiFi registration service SupaFi (<https://www.supafi.co.uk>), which connected over 5 million users last year. Our services are installed in hotels, libraries, schools, universities and blue-chip headquarters and supported by our 24/7 support centre.

“

As a fast growing business we are constantly looking to increase our team but struggle sometimes to find appropriate training and skills providers . Anthony from the Growth Hub has opened our eyes to the support available for ambitious businesses like ours in the D2N2 region and was invaluable in helping us find the right candidates.”

Will Evans, Performance Networks, Nottingham
