

BUSINESS INVESTMENT FUND - CASE STUDY

TQC Ltd Invest in CAD Systems

TQC
Automation & Test Solutions

TQC is a privately owned company based in Nottingham, who for over 35 years have been providing innovative turnkey solutions to special engineering applications. These automated systems are to the design, manufacturing and testing requirements of many companies.

TQC were successfully awarded a grant from the D2N2 Growth Hub Business Investment Fund. The grant will allow investment into developing existing mechanical and electrical CAD systems including the purchase of software and hardware.

To help migrate their existing CAD data the award will also allow the commissioning of a service provider to install new systems and ensure all current and past project data is retained.

This investment is aimed at improving design capabilities and to increase productivity and efficiency. This will enable TQC to have better control of costs and thus grow market share.

To find out more about the types of systems TQC design and manufacture, please visit www.tqc.co.uk.

KEY POINTS

Support Received

D2N2 Business
Investment Fund

Outcome

Grant awarded to:

- Purchase new software and hardware
- Migrate existing CAD data
- Improve design capabilities

"TQC is really excited about the grant assistance that the D2N2 ERDF has given. In the new work reality of remote working, this project will extend our capability to supply hi-tech machines whilst enabling safe working for our staff"

Mark Jones, TQC Sales Director
